SUMMARY

Independent Contractor With over five years of experience, the Full Stack Developer has designed and implemented high-performance web applications. adept at front-end and back-end development using React.js, Next.js, Node.js, Express.js, and TypeScript. proficiency in developing custom eCommerce solutions, integrating headless CMS platforms, and developing scalable APIs. demonstrated capacity to complete projects quickly while preserving long-term relationships and good client communication.

SKILLS

- **Languages:** Javascript, Typescript, PHP
- **Technical:** React JS, Next JS, Node JS, Postgres, Mongo DB, Supabase, Git, Sass/CSS, Firebase, Prisma ORM, Drizzle ORM, Socket.io, Redux, GraphQL
- **CMS:** Sanity io, Strapi, Storyblok

EXPERIENCE

Full Stack Developer (Freelance), Surat

January 2020 – Present

- Engineered, crafted, and launched **20+ responsive web applications** using **React.js, Next.js, Node.js, and Express.js**.
- Developed **RESTful and GraphQL APIs** to enhance data integration and reduce response times.
- Tailored and deployed **headless CMS** platforms such as **Sanity.io, Strapi, and Storyblok** for dynamic content management.
- Built **eCommerce functionalities**, including custom checkout flows, product filtering, and secure payment integrations for **Shopify** and **WooCommerce**.
- Improved **application performance by 40–50%** through code optimization, lazy loading, and caching techniques.
- Collaborated with clients to gather requirements, provide technical guidance, and deliver solutions within deadlines.
- Leveraged **TypeScript**, **Tailwind CSS**, and modern frameworks to create maintainable, scalable, and visually engaging interfaces.
- Managed deployments via **Vercel**, **Git**, and **CI/CD pipelines** to ensure reliable releases and version control.
- Applied **SEO best practices**, **accessibility standards**, and **responsive design** principles to improve UX and visibility.
- Provided **post-launch support**, updates, and maintenance to sustain long-term client satisfaction.

PROJECTS

Event-Lo - Next.js, React, Tailwind CSS, Sanity.io

- Event management platform focused on responsive design, SEO optimization, and high performance.

The Top Analysts - Next.js, TypeScript, GraphQL, Sanity.io

- Finance analytics platform with content management, data-driven insights, and optimized performance.

Brain Root - Next.js, TypeScript, Tailwind CSS, Node.js

- Modern web application featuring headless CMS integration, fast performance, and a responsive UI.
